## VSA-economy

With the VSA-economy, we developed a product where all of the complicated electronics made way for simplicity. This has been achieved through pneumatic controls, clever mechanical solutions and manual controls where possible.

All of this, of course, without losing sight of safety and functionality, and while retaining the quality you are used to in Van Schijndel products.

When thinking of simplicity, we think of a mechanical bin rim lock, self-guiding bin catcher, combined comb and DIN arms, manually operated hydraulic controls and pneumatically controlled hydraulic valves, to name a few examples. The system is fitted with double emergency buttons to be able to stop the installation in case of a calamity.

The VSA-economy can be fitted with an SCB1 100 lifter and roof-fitted winch.

## Body ECONOMY

## Tailgate

Body		16m <sup>3</sup>	18m <sup>3</sup>	20m <sup>3</sup>	22m <sup>3</sup>
Width	(mm)	2490			
Height from chassis (C)	(mm)	2510			
Length (A)	(mm)	3750	4100	4550	5050
Length (B)	(mm)	5650	6000	6450	6950
Total weight	(kg)	4910	5020	5430	5865
Capacity tailgate	(m <sup>3</sup> )	>2	>2	>2	>2
Nett capacity body	(m <sup>3</sup> )	16	18	20	22
Options		footboards * flap * lifting device * winch			

## Lifting device

## SCB1100 / roof winch

Containers	80 - 340 litre	(EN840-1)
	500 - 1100 litre	(EN840-2)
	770 - 1100 litre	(EN840-3)
Weight	ca.375	(kg)
Winch capacity	4000	(kg)

• The VSA-economy is only available outside of the EU, and does not have CE certification.
